

AP Structure at JFSS

- **Grade 9 and 10 pre-AP Program**

Students begin preparatory groundwork for senior AP courses. The core curriculum covers English, Mathematics, Science, Social Sciences and French.

- **Grade 11 and 12 AP Program**

Students choose a minimum of two and a maximum of five AP courses in their senior years. Students continue their rigorous training at the senior level while preparing to write AP exams. The senior AP Program maximizes flexibility by allowing students to prepare for AP exams in the subject(s) of their choosing. A high score on an AP exam can lead to a credit in university (depending on the university and the program to which a student applies).
