

**Introduction to Business, Grade 10 – Open  
BBI 200**

Are you interested in exploring ways to make and save money to achieve the lifestyle you want? Step into the shoes of a business owner by developing a product and then selling it at school to determine your profit.

This introductory course explores the various functions of business and includes a important unit on managing your money – budgeting, saving, investing and credit. Students will develop a strong understanding of Marketing, Accounting, Human Resources and International Business and apply theories to practical, everyday life and business situations. Working individually and in groups, students will use IT to learn about business and to create various items.

**Prerequisite:** None
