

Foundations of College Mathematics, Grade 11 – College Preparation

MBF 3C0

- In this course, students learn about Making Financial decisions through investigation of simple and compound interest
- Students will also explore various mathematical models such as quadratic and exponential through real world problem solving. In addition they will extend their knowledge of trigonometric ratios and solve related word problems
- With this course, you can go onto grade 12 Foundations for College Math

Prerequisite: Grade 10, Foundations of Mathematics (MFM 2P0) **OR**
Grade 10, Principles of Mathematics (MPM 2D0)
