

Biology, Grade 11 – University Preparation
SBI 3U0

This course furthers students' understanding of the processes involved in biological systems. Students will study concepts related to genetic continuity and how traits are inherited; the theory of evolution and mechanisms by which evolution occurs; the anatomy and interrelationship of internal animal organ systems; the diversity of living things; and the anatomy, growth, and functions of plants. This course focuses on the theoretical aspects of the topics under study, and helps students refine skills related to scientific investigation.

Prerequisite: Science, Grade 10, Academic (SNC 2D0)
