

Chemistry, Grade 12 – College Preparation

SCH 4C0

Grade 12 College Preparation Chemistry uses a variety of scientific inquiry activities to gain a deeper understanding of chemistry including: qualitative and quantitative analysis, organic chemistry, electrochemistry, and the effect chemicals have on our lives and the environment. Strong emphasis is placed on scientific investigation where students are asked to follow the scientific inquiry process which includes: forming hypothesis, data collection, data analysis and drawing conclusions.

Prerequisite: Science, Grade 10, Academic (SNC 2D0) or Applied (SNC 2P0)
