

Science, Grade 9 – Locally Developed

SNC 1L0

The focus of this course is the development of transferrable scientific skills, e.g. observation, inference, recording and reporting, through problem-solving and experimentation. Topics may include, though are not limited to: Nature of Science, Space/Our Solar System, Chemicals and Their Properties, The Human Body/Nutrition. Students will design and conduct investigations to test a product claim of their choosing. They will also build and present a model of a habitat used for space exploration.

Prerequisite: None
