

Science, Grade 9 – Applied**SNC 1P0**

This course enables students to understand basic concepts in biology, chemistry, earth and space science, and physics; to develop skills in the processes of scientific inquiry; and to apply their knowledge of science to everyday situations. Students will design and conduct investigations into real-world problems and issues related to ecology and ecosystems; atomic and molecular structures and the properties of elements and compounds; the universe and space exploration; and the principles of static and current electricity.

Prerequisite: None
