

Exploring Creative Technologies, Grade 9 – Open TIJ 100

Students will explore several areas of technology courses offered at Rick Hansen Secondary School such as:

- Construction and woodworking
- Manufacturing
- Graphic design, and video
- Electronics and computer technology
- Tech design, Auto CAD
- Animation

This is a hands-on course where students will work on projects such as:

- Rocket and CO2 Car designing and building
- Create an animated movie and magazine cover
- Create a public service announcement commercial
- Basic camera skills, video shot types and editing techniques.
- Create orthographic drawings

Students will explore the design and problem solving steps used to complete these projects

Prerequisite: None
