

Mississauga Secondary School: Course Overview

Department: The Arts

Subject Area: Visual Arts

Course: AWT 100, Grade 9 Non Traditional, Open

The organization and evaluation practices of this course have been designed to conform to the requirements of Ontario Ministry of Education policies (Growing Success Document).

Course Description:	Course Themes and Learning Goals
<p>This course is exploratory in nature, offering an opportunity for students to develop their skills and knowledge in the Non Traditional Visual Arts. The emphasis of this course is student learning through self-reflection. This course will develop students' artistic knowledge and skills by introducing them to non traditional media technologies and processes. Students will experience a multitude of learning through analysis, appreciation and production of various non traditional art forms; including, digital photography, digital video, computer graphics programs and collage. Studio assignments provide students with many opportunities to deepen their understanding of the elements of art and principles of design and the relationship of form, content and context in art. Students will consider how art reflects the time in which it is created by studying a variety of modern and contemporary artists and art forms.</p> <p>Prerequisite: None</p>	<p>Theme 1</p> <p>SOUNDOGRAPHY What does Sound Look Like?</p>

Assessment and Evaluation - Key Terms and Definitions:

Assessment for Learning: The ongoing process of gathering and interpreting evidence about student learning for the purpose of determining where students are in their learning, where they need to go, and how best to get there (e.g. portfolios, observations, conversation, Non-graded quizzes, pre-tests, minute papers, exit tickets, written assignments, concept maps, interviews, progress monitoring, performance). The information gathered is used by teachers to provide feedback and adjust instruction and by students to focus their learning. Assessment for learning is a high-yield instructional strategy that takes place while the student is still learning and serves to promote learning.

Assessment as Learning: The process of developing and supporting student metacognition. Students are actively engaged in this assessment process: that is, they monitor their own learning (e.g. learning logs, metacognitive questions and self-assessment using Graphic Organizers, Interviews, Conferences); use assessment feedback from teacher, self, and peers to determine next steps; and set individual learning goals (e.g. goal setting). Assessment as learning requires students to have a clear understanding of the learning goals and success criteria (e.g. co-constructing rubrics/check lists, self-assessment, peer assessment).

Assessment of learning: The process of collecting and interpreting evidence for the purpose of summarizing learning at a given point in time, to make judgements about the quality of student learning on the basis of established criteria, and to assign a value to represent that quality. (e.g. test, summative assignment) The information gathered may be used to communicate the student's achievement to parents, other teachers, students themselves, and others. It occurs at or near the end of a cycle of learning.

Assessment for learning

(e.g., diagnostics for next steps)

Assessment as learning

(e.g., self and peer assessment – students are taking part in the learning process)

Assessment of learning

(e.g., evidence of knowledge learned/
mark reporting/ unit summative)

Learning Skills:

It is an expectation that each student is assessed not only on their academic achievement but also on their Learning Skills. These skills include: *Responsibility, Organization, Independent Work, Collaboration, Initiative, and Self Regulation*. Learning skills will not be factored into the grade for this course but will appear on the report card. It is important to remember that the development and consistent practice of these skills will influence academic achievement.

Late and Missed Assignments

Please see the Policy on Absence of Evidence of Student Achievement as outlined of the student agenda

Plagiarism and Cheating

Please see the Policy on Plagiarism and Cheating as outlined in the student agenda

Homework, Assignments and Effective Communication

To earn a credit students have a responsibility to submit sufficient evidence of understanding within established deadlines. It is in the student's best interest to submit evidence of learning at every opportunity that is provided, so that his/her grade accurately reflects what was learned. In the event that a student produces insufficient evidence in the key understandings for the course, the entire credit is at stake.
